

WORK EXPERIENCE

CHARUSAT University (CSPIT)

Jan 2026 – Apr 2026 | Anand, Gujarat

Python · TensorFlow · scikit-learn · NumPy · Pandas · Matplotlib · Jupyter

- Trained & evaluated supervised ML models (**Random Forest, SVM, Logistic Regression**) on structured research datasets; improved **F1 score by 12%** through systematic hyperparameter tuning and 5-fold cross-validation.
- Engineered end-to-end **feature engineering** pipelines (null imputation, scaling, one-hot encoding), **reducing data prep time ~40%**; produced ROC-AUC, precision-recall and confusion matrix reports for faculty stakeholders.

PROJECTS

AutoDevs

OPEN SOURCE CLI · PRODUCT HUNT

Live

GitHub

2025 – Present

Go · Node.js · TypeScript · GitHub API · npm · Homebrew · Scoop · Docker

- Shipped a **cross-platform developer CLI** with 40+ packages, 9 dev-role profiles, 3 OS targets — published on npm, Homebrew, Scoop & Docker and **featured on Product Hunt** with 1,000+ GitHub star campaign.
- Built an intelligent **GitHub Scanner** that indexes public repos, infers language/framework confidence scores using frequency-weighted heuristics, and outputs an **ML-profile-aware skill matrix** with personalized upgrade paths.

DevMentor

AGENTIC AI · LLM PIPELINE

GitHub

2026 – Present

Go · Flutter · LLM APIs · GitHub REST API · Chain-of-Thought Prompt Engineering

- Designed a **voice/text → code → GitHub PR** mobile agentic pipeline — few-shot structured prompts feed schema-validated Go output parser for syntactically correct code with **zero manual steps**.
- Architected **Ralph Loop** (attempt → test → log → retry) for self-correcting LLM code generation; used chain-of-thought prompting to enforce multi-language output structure across Go, Python, and TypeScript.

BinaryBattles

COMPETITIVE PROGRAMMING PLATFORM

Live

GitHub

Mar 2026 – Present

Node.js · React · TypeScript · PostgreSQL · Redis · Bull · Docker · Nginx · PgBouncer

- Architected a distributed code judge supporting **50+ concurrent submissions** via Redis Bull queues + isolated Docker sandboxes — delivering real-time feedback in **under 3 seconds** with zero cross-contamination.
- Built real-time multiplayer game modes (Knife Choice, Timed Duels) using **WebSockets** with PostgreSQL leaderboards, PgBouncer connection pooling, and Nginx reverse proxy for **high-concurrency traffic**.

Coastal Guardian

DEEP LEARNING · COMPUTER VISION

GitHub

2025

Python · TensorFlow · CNN · Neural Networks · NASA Satellite Imagery · scikit-learn

- Designed a **CNN deep learning neural network** on NASA satellite imagery to classify 4 coastal threat categories (erosion, pollution, algal bloom, clear) using ResNet50 transfer learning and augmentation on imbalanced classes.
- Achieved **87%+ validation accuracy** on 2,400 image patches via systematic **statistical model evaluation** (confusion matrix, ROC-AUC, precision-recall); visualized results with Matplotlib/Seaborn for research stakeholders.

OPEN SOURCE · CERTIFICATIONS · LEADERSHIP

- **Ollama (168k★)** | Mar 2026 — PR #14992: Removed duplicate TopLogprobs validation dead code across GenerateHandler and ChatHandler in a production Go LLM inference engine.
- **Analytics with Python** – Coursera (2026) · **Algorithm Design** – Coursera (2026) · **Foundations of DSA** – Packt (2024) · **Coordinator**, C Titans Hackathon (50+ participants) & SUPERNOVA — CHARUSAT.

SKILLS

ML / AI

TensorFlow · scikit-learn · Deep Learning · Neural Networks · NumPy · Pandas · Matplotlib · Seaborn · Feature Engineering · Jupyter · LLM APIs · Prompt Engineering

LANGUAGES

Python · Go · TypeScript · JavaScript · C · C++ · Java

BACKEND

Node.js · Express.js · Go · REST APIs · WebSocket

DATABASES

PostgreSQL · MongoDB · Redis · PgBouncer

DEVOPS

Docker · Nginx · GitHub Actions · CI/CD · Linux

MATHEMATICS

Probability & Statistics · Linear Algebra · Calculus · Discrete Math · Statistical Modeling

EDUCATION

CHARUSAT UNIVERSITY

B.Tech – CSE (CSPIT)

Anand, Gujarat · 2024 – 2028

CGPA: 8.23 / 10

Probability & Statistics · DSA · DBMS · Networks · Python for DS

HSC – SCIENCE GSEB 2024

95.40 Percentile

SSC GSEB 2022

98.45 Percentile

OBJECTIVE

First-year B.Tech CSE at CHARUSAT with hands-on ML experience in supervised learning, feature engineering, and statistical model evaluation. Applying for **Amazon ML Summer School 2026** to deepen expertise in deep learning, neural networks, and probability.

EXTRA CURRICULARS

- Contributor — **Ollama 168k★** open-source LLM engine.
- Featured on **Product Hunt** — AutoDevs CLI launch.
- Hackathon coordinator — **50+ participants** at CHARUSAT.
- Active competitive programmer on **LeetCode**.

SCAN · HEET18.VERCEL.APP
